PROFILE:

Results-oriented and highly motivated individual with a unique blend of front-end and back-end software engineering, with a deep-rooted passion for technology. I made a pivotal career shift from a long history in pharmaceuticals by pursuing a B.S. in Computer Science to become a software engineer in June of 2021. My ultimate objective is to leverage my educational background and skills in web development to forge a meaningful and lasting career in the field, all while becoming an invaluable asset to any collaborative team.

Skills:

HTML	NoSQL	SQL
React	JavaScript	AWS
Node.js	GitHub	Heroku
Redux	MongoDB	CSS
HTML	Agile	Heroku
NPM	Java	C++
Python	Docker	Angular.js
TensorFlow		

EXPERIENCE:

Software Engineer / Web Developer - Freelance

Self-Employed, Surprise, Az

March 2019 - Present

- Developing websites and single page web apps using React.js, Redux, React Hooks, Node.js, Express, MongoDB, Postgres, Mongoose, JavaScript, Tailwind, Heroku, and more.
- Working in collaboration with local engineers in various agile/scrum development cycles. Utilizing tools such as Jira like ticketing systems (Trello), Figma, GitHub, and more to organize and contribute to ongoing projects with other designers and software engineers.

Software Engineer

IeLinks,inc, Phoenix Az

March 2019 – September 2019

- Migrating legacy codebases into GitHub repositories for streamlined version control and collaborative development.
- Leading the transition from older technologies to modern frameworks like React.js and JavaScript.
- Creating customized educational courses for logistical companies, including Commercial Driver's Licensing preparation.
- Managing multiple company-wide projects simultaneously, ensuring adherence to best practices, timelines, and quality standards.
- Revamping web applications to improve performance, responsiveness, and user experience.
